# TRAVERSE®

SYSTEM MANAGER
Flexibility, customization, and a full complement of tools

TRAVERSE gives you the tools you're already familiar with and provides a seamless interface to Microsoft products such as Word, Excel, and Mail as well as HTML language for the Internet. It was developed with Visual Basic™, SQL Server, and Microsoft Access—the most powerful databases available. Access has a simple design philosophy, so it is easy to use for everyone—regardless of the level of expertise. SQL Server integrates with the BackOffice family of products, including Exchange and Internet Information Server.

TRAVERSE runs on Windows Vista, Windows 2000, Windows XP, and Windows Server 2003. Source code is available so that you can customize the software to meet your unique needs. System Manager provides features such as multilingual and multicurrency capabilities, and users can choose keyboard navigation, point-and-click navigation, or both. And, it's easy to move and merge information.

TRAVERSE manages your financial information quickly, easily, and effectively. You can do quick sorts on any field in ascending or descending order with just one mouse click. In addition, TRAVERSE provides password protection by application, menu, function, and database objects. You'll also find table-driven international and industry-specific language sets and such individual workstation options as keyboard controls, toolbars, and language sets.

Quick, easy option and default setup of information about your company and the roles of people in your company.
SYSTEM MANAGER

Additional System Manager Features:

- online help for keyboard commands
- table-driven currency with easy updating of currency exchange rates
- support of multiple companies
- conventional or pull-down menu structures with custom options

- easy to modify with capability to prevent modification
- comprehensive online help
- print to file with rich or normal text, or output to Excel or HTML
- optional report previewing before printing
- "quick search" method for finding fields

TRAVERSE v10 Hardware Requirements:

Hardware and software requirements are constantly changing. Open Systems recommends using as fast a processor as possible. Please remember that RAM requirements increase with the number of users. Current hardware and software requirements can be found on our website at www.osas.com.

The Server Manager is used to manage users, and roles, permissions and to backup, restore, and otherwise maintain your TRAVERSE database.
