WHY BLACKPOINT CYBER?

Streamlined.
Effective.
Action-Focused.

Never let cyber adversaries get the best of you. With Blackpoint Cyber, experienced security analysts use state-of-the-art MDR technology to catch what others miss and take action at the first sign of threat. Trust Blackpoint to do the hard work so you don't have to.

The Blackpoint Cyber Difference

Blackpoint wins the unfair cyber fight while helping you protect what's most important. Bringing pain to the adversaries, their team takes out the advanced persistent threats found in today's cyber landscape. *The Blackpoint mission?* Provide 24/7, unified detection and response services to organizations of all sizes around the world.

The company is proudly built by former US Department of Defense and Intelligence security experts who are focused on stopping malicious tradecraft and safeguarding you, full stop. With decades of real-world cyber experience, the Blackpoint team leverages insider knowledge to help you fight back and thrive, not just survive in the threat landscape.

Why Blackpoint Cyber?

Cybersecurity Leadership

Blackpoint values ownership, strong ethics, and quality execution. Their leadership team is committed to defending the cyber community so you can focus on your business.

Commitment & Respect

Blackpoint proudly delivers true protection from adversaries threatening your livelihood. From their technology to their operations, Blackpoint keeps your needs top of mind.

Real-World Threat Expertise

Founded by former National Security Agency (NSA) cyber operations experts, the Blackpoint team continues to bring nation-state grade technologies and tactics to organizations around the world.

24/7 MDR Protection

Blackpoint's Managed Detection and Response solution provides 24/7 protection against even the most advanced of modern-day cyberthreats. Sleep easy knowing they guard your business around the clock.

Rapid Detection & Response

Faster than any other solution on the market, Blackpoint's world-class SOC combines network visualization, tradecraft detection, and endpoint security to detect lateral movement in its earliest stages and stop the spread.

True, Action-Focused Approach

Blackpoint detects and detains threats on your behalf immediately. By the time you hear from them, the threat has already been triaged and removed from your environment. Trust them to provide real action, not just notifications.
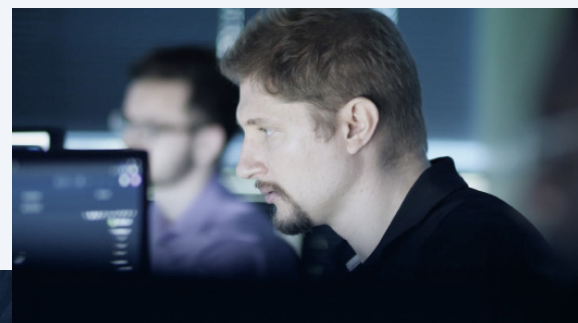

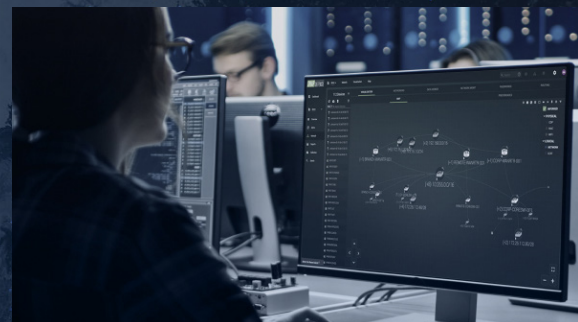

Start Winning with Blackpoint in Your Corner

Businesses choose Blackpoint's ecosystem of integrated solutions to get ahead of various cybersecurity challenges and requirements.

MDR

True 24/7 MDR. Blackpoint's patented MDR solution is the first contextually aware breach detection and response program on the market. With unparalleled visibility into hacker tradecraft, lateral spread, and remote privileged activity, we stop advanced attacks immediately.

BLACKPOINT MDR ADD-ONS

LogIC

Hyper-efficient logging and compliance. Leave complicated installs and agent rollouts in the past. Quickly configure log settings, generate compliance reporting, and automatically map against hundreds of compliance requirements all at once with push-button setup. Finally, the future of compliance is here.

Cloud RESPONSE

Cloud infrastructures actively secured. Extend the power of MDR and bring 24/7 expert security monitoring and a unified response to your cloud workflows. Trust leading edge cybersecurity to actively defend your cloud platforms, hybrid environments, and everything in between.

BLACKPOINT RISK

Cyber liability insurance for businesses. Fact – if you have sensitive data, you have cyber risk. Paired with our MDR solution, Blackpoint RISK keeps your business secure. Receive tailored policies to fit your specific industry and organization size so you can live to fight another day in this cyber landscape.

See Blackpoint MDR in action

Businesses around the world rely on Blackpoint for high-performance, easily upgradeable, and robust cybersecurity that can protect against today's and tomorrow's threats every time.
